## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Chun et al. (US 5,625,732).

With regard to claim 1, Chun et al. disclose an optical interface unit (col. 2, line 18 to col. 9, line 50 and fig. 3) comprising:

- A submount 201 having a plurality of conductive traces 213 on the surface and a plurality of conductive vias 221 and 226 that pass through a body of the submount 201 (fig. 2);
- A semiconductor array 121 comprised of semiconductor elements 107 and 116,
   the semiconductor array 121 attached to the submount 102 such that the
   semiconductor elements 107 and 116 are electrically connected to the plurality of
   conductive vias 221 and 226 (fig. 1 and 3);
- A plurality of bonding wires 129 and 132 electrically connecting the semiconductor elements 107 and 116 to at least two of the conductive traces 215 and 223 (fig. 2).

Application/Control Number: 10/028,288

Art Unit: 2814

With regard to claims 2 and 14, Chun et al. disclose the semiconductor array 121 includes a plurality of vertical cavity surface emitting laser, VCSEL (col. 3, lines 1-10).

With regard to claims 3 and 15, Chun et al. disclose the semiconductor array 121 includes a plurality of detector (col. 2, lines 57-67).

With regard to claims 4 and 22, Chun et al. disclose the submount 102 includes a mounting well 139, where the semiconductor array 121 is in the mounting well 139, and where the semiconductor array 121 includes a top surface 138 that does not protrude from the mounting well 139 (fig. 1).

With regard to claims 5-6, 11, and 16, Chun et al. disclose each of the conductive traces and connectors 141, 142, and 144 includes a plurality of contact pads 104 and 106 (fig. 1).

With regard to claims 7-8 and 18-19, Chun et al. disclose an optical coupler 302 on the locating spacer 313 that extends from the submount 301, where the optical coupler 302 is aligned with the semiconductor array 121 (fig. 1 and 3).

With regard to claims 9 and 20, Chun et al. disclose the submount 102 and 202 includes ceramic (col. 2, lines 40-41 and col. 5, line 49).

With regard to claim 10, Chun et al. disclose at least one of the plurality of conductive vias 211 electrically connects to one of the conductive traces 203 (fig. 2).

With regard to claim 12, Chun et al. disclose a printed circuit board, PCB, 102 electrically connected to the conductive pad 104 (col. 2, lines 39-45 and fig. 1).

With regard to claim 13, in addition to the limitations disclosed in claim 1 above. Chun et al. also disclose:

Application/Control Number: 10/028,288

Art Unit: 2814

- A submount 202 comprised a lower portion (fig. 2), a conductive trace 213 on the lower portion, an upper portion over the lower portion, and a plurality of conductive traces 223 on the upper portion, where the lower portion and the conductive trace on the lower portion extend beyond the upper portion (to reach the IC chip 207 and 208) to define a mounting surface of submount 202;
- A semiconductor array 121 comprised of a plurality of semiconductor elements

  107 and 116, the semiconductor array being attached to the mounting surface 218

  and is electrically connected to the conductive trace 226 on the lower portion (fig. 3).

With regard to claims 17 and 21, Chun et al. disclose a bonding connector 134 electrically connected to the contact pad 104 (fig. 1) and a PCB 102 electrically connected to the conductive pad 104 (col. 2, lines 39-45 and fig. 1).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wai-Sing Louie whose telephone number is (703) 305-0474. The examiner can normally be reached on 7:30 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on (703) 308-4918. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7722 for After Final communications.

Art Unit: 2814

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
